# Kosim Micro-Sphere Pillow

**K**osim Micro-Sphere Pillow is made of very high density fabric making it resilient and durable with high permeability for excellent ventilation. Each micro sphere pillow is filled with millions of fine beads which allow a perfect mould of anyone's sleeping posture giving optimal support.

The KOSIM Micro-Sphere Pillow combines the concept of a water pillow, hi-tech polystyrene stretchable beads and the elegant look of a traditional pillow design.

The pillow is divided into 2 separate layers. The first layer is filled with soft hypo-allergenic fibre filling and the second layer is filled with millions of micro beads. Both layers' materials are made up of high density fabric making it resilient and durable with high permeability for excellent ventilation.

Each pillow is filled with over a million fine micro beads 0.3 ~ 0.5mm in diameter. These hi-tech shell fabrics are stretchable allowing the micro beads to flow and mold into different shapes.

The micro sphere pillow adjusts to the user's natural body temperature because of the mechanical design of each micro bead. The micro beads are shaped in a sphere form creating space within each micro bead allowing airflow in and out of the pillow; this allows body heat to escape from the pillow.

Memory foam retains body heat due to its dense material often resulting in overheating of the pillow making it uncomfortable to fall asleep. Unlike memory foam, our pillow allows the body heat to escape from the pillow allowing the user to have uninterrupted and higher quality sleep.

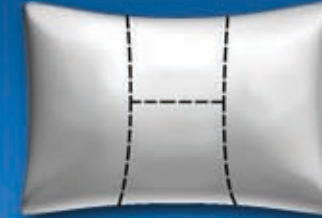

Unlike regular pillows, a KOSIM Micro-sphere pillow automatically provides continuous support in any sleeping position giving you the optimum support and at the same time providing a massaging effect which can enhance blood circulation.

The beads allow the pillow to mould perfectly to support anyone's sleeping posture compared to traditional pillows where they only support the neck area. The micro Bead Pillow addresses the needs of both neck and shoulders providing a proper sleeping position. Micro Bean Pillows provide uniform support to the neck and shoulders alleviating stress and other problem areas.

While sleeping on your back or sideways, simply recline into the pillow and allow the beans to follow the natural contour of your neck and shoulders, providing support to the muscles where it is most needed (see picture).

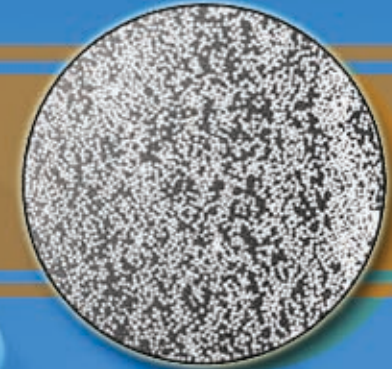

Use the KOSIM Micro-sphere pillow to restore your energy by reversing the negative effects of fatigue; freshen your appearance, enhanced sleep rejuvenates your skin to ease wrinkles and soothe daily stresses. Uninterrupted sleep is associated with improved coping skills. Remember, a higher quality sleep will make you look and feel better.

## "H" Sectional Divided Design (SDD)

Ensures the supporting spheres stay in place allowing optimal support for neck and head for both side sleepers and back sleepers.

- Mid-section is indented to provide optimal support for back sleepers
- 5" height at side to fit the shoulder width for side sleeper

- Each gram contains 20,000 micro spheres to cradle the head
- Outer shell made of spandex fabric that stretches to any position

• Beads allow the pillow to mould into any sleeping posture giving optimal support.

• Because it conforms to any shape, it is suitable for all body types.

• No hassle of measuring, adding, and pouring out water.

• 100% cotton pillow cover

• Machine washable / hang dry only

• Micro-Sphere Pillow is also great for sitting
